

## ENOCKEVANS KIPRUTO KIRUI

DATA SCIENCE & SOFTWARE DEVELOPMENT | M.S. CANDIDATE, DATA SCIENCE AND ANALYTICS  
Allendale, MI | 616-329-6930 | [enock.kirui.dev@gmail.com](mailto:enock.kirui.dev@gmail.com) | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

---

Data Science and Analytics graduate student with a Computer Science background and experience in software development, machine learning, statistical modeling, and data-driven applications. Skilled in Python, R, SQL, AWS, JavaScript, React, Node.js, Electron, and relational and NoSQL databases. Experienced in building business software and analytics solutions from requirements and design through testing and deployment.

### TECHNICAL PROJECTS

---

#### **InventraPOS - Offline-First POS and Inventory Management System** | [GitHub Repository](#)

- Developed a hybrid POS and inventory system using React, Electron, JavaScript, SQLite, and cloud APIs.
- Implemented two-way synchronization between local SQLite storage and a cloud SQL database.
- Built manual, startup, and automated 60-second background synchronization workflows.
- Built modules for products, inventory, sales, payments, customers, suppliers, purchasing, discounts, taxes, register sessions, and user roles.
- Managed feature-based development and version control with Git and GitHub.

#### **Custom Software Developer, Zelic Commercial Investment, Nairobi, Kenya**

Dec 2019 – Mar 2024

- Founded and operated a custom software development business delivering tailored applications for client needs.
- Developed point-of-sale and inventory management software to support sales, recordkeeping, financial tracking, and daily business operations.
- Built a school accounting system to streamline financial recordkeeping and administrative reporting.
- Managed the full software development lifecycle, including requirements gathering, system design, coding, testing, deployment, troubleshooting, and maintenance.
- Collaborated directly with clients to identify operational needs and translate business requirements into practical software solutions.
- Maintained and enhanced applications as requirements evolved, improving reliability, usability, and workflow efficiency.

### TECHNICAL SKILLS

---

**Programming & Analytics:** HTML, PHP, Python, R, SQL, JavaScript | **Frameworks & Tools:** React, Node.js, Electron, REST APIs, Git, GitHub | **Cloud & Databases:** AWS, SQLite, MongoDB | **Data Science:** Machine Learning, Statistical Modeling, Data Analysis.

### SOFT SKILLS

---

**Professional Effectiveness:** Adaptability, Attention to Detail, Time Management, Organization, Reliability, Professionalism, Strong Work Ethic, Decision-Making, and Accountability.

**Leadership & Collaboration:** Leadership, Initiative, Entrepreneurial Mindset, Teamwork, Creativity, Problem Solving, Critical Thinking, Communication, Interpersonal Skills, Relationship Building, Collaboration, Tactfulness, and Friendliness.

### ADDITIONAL TECHNICAL PROJECTS

---

#### **AI-Assisted Care Reporting & Document Analysis System**

- Developed a Node.js and Express application for uploading documents and structured care data for analysis and report generation.
- Designed AI-assisted monthly summaries, trend reporting, and document review workflows to reduce repetitive manual analysis and improve consistency.
- Implemented file upload workflows and JSON-based storage with a scalable design for future database-backed expansion.

### EDUCATION

---

#### **Master of Science in Data Science and Analytics**

Expected May 2027

Grand Valley State University, Allendale, MI

#### **Bachelor of Science in Computer Science**

Dec 2021

Kabarak University, Nakuru, Kenya

## ACADEMIC PROJECTS

---

### **Predicting Inventory Needs - Linear Regression Mini-Competition**

- Applied linear regression to inventory-related data using R and R Markdown and documented the analysis in GitHub.

### **Digit Classification - Kaggle Challenge**

- Built machine learning classification models to classify handwritten digits from the MNIST dataset.

### **Multimodal Data Prediction - Kaggle Challenge**

- Analyzed cross-modal feature relationships to predict one data modality from another in a Kaggle machine learning challenge.

## RELEVANT COURSEWORK

---

**Current Coursework:** Data Visualization; Statistical Programming (SAS); Seminar in Professional Science Practice.

**Graduate Coursework:** Machine Learning; Statistical Computing and Graphics with R; Statistical Modeling I; Data Engineering; Cloud Applications Development; Amazon Web Services (AWS).

**Undergraduate Coursework:** Relational Database Management Systems; Data Structures; Design and Analysis of Algorithms; Object-Oriented Programming; Web Application Programming; Software Development Life Cycle; Software Quality Management; Android Mobile Programming; Computer Graphics.

## PROFESSIONAL DEVELOPMENT

- Founded Zelic Commercial Investment in December 2019 as a platform for software development and client-facing project experience.
- Expanding skills in data analytics, machine learning, deep learning, DevOps, Agile practices, and continuous delivery pipelines.
